

Václav Krajčář

Logistics Specialist & Aspiring Document Solutions Architect
Technical Focus: AI Automation | Data Logic | System Integration

Contact Information

- **Location:** Teplice, Czech Republic (Available for Remote/EU Travel)
- **Phone:** +420 721 130 470
- **Email:** krajkar.venda@gmail.com
- **LinkedIn:** [linkedin.com/in/václav-krajčář-2482933a8](https://www.linkedin.com/in/václav-krajčář-2482933a8)

Professional Profile

Technically oriented professional with a unique blend of physical precision and digital logic. I focus on bridging the gap between raw data and efficient output. I am an expert in **clean data principles** and **process automation**, utilizing AI and modern web technologies to optimize complex workflows. My background in craftsmanship provides me with a meticulous attention to detail essential for complex document architecture and form design.

Core Technical Competencies

- **Data & Logic:** Deep understanding of WMS data structures, "clean data" accuracy, and system troubleshooting.
 - **Development Stack:** Proficient in **TypeScript**, **React**, and **Tailwind CSS**.
 - **Automation & Scripting:** Active study of **Python** and **Prompt Engineering** to automate administrative reporting and logic.
 - **Standards:** Strong foundation in logic mapping and documentation finalization.
 - **Languages:** **English C1** (Professional Working Proficiency).
-

Technical Projects

InvoiceProcessor | github.com/Viinck0/InvoiceProcessor

- **Description:** Developed an AI agentic system for automated invoice data extraction, prioritized for enterprise-grade security and data privacy.
- **Tech Stack:** Python, LangChain, Ollama (Local LLM), AI Agentic Workflows.
- **Key Impact:** Implemented a fully local (on-premise) execution environment, eliminating the need to transmit sensitive financial data to external APIs (e.g., OpenAI). This directly addresses the primary barrier to AI adoption in corporate environments.

- **Architecture:** Leveraged LangChain-based agentic workflows for intelligent validation and structuring of unstructured documents.
-

Professional Experience

Logistics & Systems Specialist | Showdown Displays

January 2017 – Present

- **System Integration:** Daily management of **Warehouse Management Systems (WMS)** and scanners, ensuring seamless data flow between physical inventory and digital reporting.
- **Logic & Troubleshooting:** Identifying and resolving discrepancies between physical states and system evidence through root-cause analysis.
- **Workflow Optimization:** Designing "shortest path" workflows and defragmenting storage logic to increase operational speed.
- **Digital Transformation:** Independently implementing AI tools to eliminate routine administration and designing UX improvements for internal systems.

Designer & Manufacturer (Proprietor) | Mayhem Longboards

June 2013 – February 2018

- **Design Architecture:** Managed complete product lifecycles, from technical wood shaping to graphic design using **Adobe Photoshop/Illustrator**.
- **Technical Precision:** Applied complex material science and lamination techniques, requiring 100% accuracy in physical "form design".

Specialized Contractor & Carpenter | Various / Karel Korb

October 2012 – February 2017

- **Technical Documentation:** Specialized in reading complex technical drawings and assembling intricate furniture/building sets.
 - **Problem Solving:** Adapted to field-specific challenges requiring immediate improvisation and logical solutions.
-

Education & Certifications

- **Certifications:**
 - **Elements of AI & Artificial Intelligence Fundamentals**
 - **Maximize Productivity with AI Tools**
 - **Grammar and Punctuation** (English Communication)
- **Formal Education:**

- **Secondary School of Construction and Engineering:** Graduated as Bricklayer (2012) and Carpenter (2010).
-
